

OCTOBER 2019 LISTINGS

RWC - Converting Makeshift Firestopping Methods into Engineered Solutions. HoldRite's HydroFlame firestop solutions keep water, smoke, and flames from spreading—they're also easier to install and more cost-effective than other methods saving you TIME and MONEY.

FREE Product Training either one-on-one or in a group for anyone involved in the construction of new builds.

Unique HoldRite® HydroFlame™ firestop systems, the UL Listed water, smoke, and firestop product systems provide a water seal for unwanted water intrusion while still protecting against the spread of fire, smoke, and gases. Also, available are water dam and water module accessories for added water-tight requirements. Their novel design transforms how cast-in-place firestop solutions are installed.

To Be or Not to Be... Technology driven

What is a big business doing to gain the advantage, and what can small to mid-size companies do to prepare for the inevitable. What does it cost? Is it really worth the investment? When is the right time? Can it really help generate more profits?
