Get Your Ducks In A Row! A 5-part Series For The Basics Of Adopting And Managing Information Technology

Companies are becoming more competitive by adopting information technologies. Yet more than 50% of IT projects fall short of expectations. How can your organization ensure the success of its next IT under-taking? Information technology is a product of science, but using IT effectively to increase efficiency, productivity and, profitability is truly an art.

This five-part series will give participants insights into trends and traps facing companies today, and best practice tips, tools, and techniques used to help IT implementations in small to mid-sized businesses.

Part 1 – To Be or Not To Be... Technology Driven

Part 2 – Doing IT Right!

Part 3 – Choosing Tech That Fits

Part 4 – Driving Innovation!

Part 5 – No Haystacks. No Needles, Either

The **EB-25 Plus** brings state-of-the-art water control technology to pressure regulators. The accurate flow control and pressure regulation of the **EB-25 Plus** eliminates the need for costly multi-valve installation such as high-low valves installed in parallel to meet varying flow requirements or multi-valves installed in series to reduce high inlet pressures to desired line pressure. The **EB-25 Plus** is a lead-free product designed to service commercial and institutional water installations that experience wide variation in water demand or for applications where there are high inlet pressures. The valve is available in 2-1/2", 3", and 4" sizes, all with flanged connections. The valve is factory set at 55 psi.

PERFORMANCE: Adj. outlet pressure range 30 psi – 85 psi Factory set pressure 55 psi Maximum inlet pressure 230 psi (1600 kPa) Max operating temperature 149°F Service Water.

AVAILABLE CONNECTIONS: 2-1/2", 3", and 4" Flanged

Due to COVID-19, it is imperative that RWC continues engaging with you to offer FREE online Product Training either one-on-one or in a group setting. This training is offered to anyone interested in learning how to convert makeshift methods into engineered solutions with our extensive CashAcme line of products.

New Construction Safety & Infection Control Resources for Association Partners

Every construction project comes with its own set of risks – from fire and water damage to equipment theft, slips and falls, cyber-attacks and even infection control.

These risks not only vary in size and complexity but can also evolve over the course of a project. That's why having proper worksite policies and procedures is so critical to avoiding hazards and potential accidents. To help your members keep workers safe and their projects running smoothly, we've developed the following risk management resources addressing common exposures.

Risks in the construction industry: <https://www.federated.ca/wp-content/uploads/2020/06/3772-005-Federated-WP-Risks-in-Construction-v04E.pdf>

Key infection control guidelines for your job site: <https://www.federated.ca/blog/workplace-safety/job-site-infection-control>
